# Who We Are

We are a specialised ICT Management company that provides services encompassing IT Managed Services, as well as Network Infrastructure Installation & Maintenance Services.

RP Networks is dedicated to servicing and providing communication networks from the major network service provider to the small and medium enterprise.

When you choose our services, your ICT needs become our top priority. We go above and beyond our call of duty to ensure that your premises are outfitted with modern, secure, and user-friendly systems that guarantee efficiency and control.

Powered by the latest software, technology, tools, and tactics at our disposal, our team is adept at building ICT solutions that are specific to each client's unique requirements.

Headquartered in Bedfordview, South Africa, our company has representation across the country and the African continent.

# Our Team

Our team, at RP Networks is made up of a diverse team of outcome-oriented, collaborative technology specialists who operate in a robust environment built for pragmatic, passionate professionals with experience in various fields with the ICT sector.

This has created a requirement in our company to prioritise our clients process performance by eliminating problems, removing redundant systems and deploying tailored solutions in a way that fits each clients unique situation.

## Our Focus & Corporate Motto?

Our goal is to help our clients to **connect, upgrade and manage** your core network infrastructure to keep up with the rapidly changing global ICT industry.

Established initially to provide secure installation & maintenance systems across South Africa, our company was founded with the vision to become the go-to ICT Installation provider. More than half a decade later, the business continues to excel and mature in line with that vision by providing our customers and business partners with robust, extensible, customizable, and security-enhanced solutions for information sharing, data exchange, services invocation and communication.

We are a **BBBEE Level 4** Provider and our values propel us to maintain integrity in all our business transactions with all our clients and investors.

### Our Mission

- To develop and maintain the best ICT solutions that enable clients to upgrade their systems with less effort, at a higher quality whilst ensuring that operational processes run efficiently.
- To deliver cost effective and best fit tailored management of ICT teams in selected specialist capabilities related to business transformation, performance improvement and continuous improvement services.
- To assist our clients to achieve and maintain world class excellence and unlock their potential to compete effectively on the global market.
- To provide our employees with specialised skills in a highly rewarding and caring working environment.

# Our Clients

We help our clients deliver shareholder and customer value through strategic transformation, operational transformation, transformation enablers and by using the best practice methodologies specific to each client's needs.

## Past Projects

### Teraco Data Centre Copper And Fibre Installations

Installation comprised of in building data centre Interconnection links between different customer racks and the main MDF's.

### Alpine Communications Client Copper Cable Installations

Alpine Communication now a division of EOH had a sub-contractor agreement with RP Networks which entailed fibre and copper cable premise installations. RP Networks provided all their splicing services as per the agreement

### Link Africa

With an ongoing contract, currently being implemented, RP Networks is one of the approved Vodacom fibre implementations companies. RP Networks is also involved in the Link Africa FTTX projects having recently completed the Edenvale and Alberton Fibre to the Home projects.

### TNJ Projects City Power Fibre Installations

Upon attaining electrification tenders with the City of Johannesburg, City Power contracted TNJ Projects to also maintain the power utilities fibre network. This then encouraged TNJ Projects to contract RP Networks to perform this on their behalf as their fibre scope was limited.

RP Networks was contracted by TNJ Projects to perform the splicing required on the MTN 44km Links on Aerial Fibre in Carletonville.

### RSS Fibre

Currently completed 2100 home passes in the Middelburg Aerorand Suburb. Has begun work in the Middelburg Golfsig and Clubville Suburbs which will add another 1100 home passes.
